

BOXLEY BLOCK, BRICK & HARDSCAPE CENTER OPENS

Center Features Thousands of Masonry and Hardscape Products and Unlimited Ideas

ROANOKE, VA—(July 10, 2008)—Boxley has opened its flagship Block, Brick & Hardscape Center creating one of the region's largest selections of high quality, innovative masonry and hardscape products in one location.

Located at 3830 Blue Ridge Drive just off Aerial Way in Roanoke, the 15,000 square-foot Center is designed as an idea resource center for home builders, general contractors, architects, their clients, and retail customers to select masonry and hardscape products that take their projects from ordinary to extraordinary.

The Center itself features thousands of samples from top masonry and hardscape product manufacturers. Many products are incorporated directly into the design and construction of the Center to give customers a better perspective of how products look installed and to spur ideas for their own projects.

"Our goal with the Boxley, Block, Brick and Hardscape Center is to provide a place where customers can get ideas for their projects and make important decisions about the materials they use by experiencing what the products will look like in a completed project," said Ab Boxley, CEO. "From the interactive Project Center to actual displays incorporated into the Center, customers can work with a Boxley representative, their architect or contractor to make the best choices to suit their tastes and budgets."

Boxley worked with several area firms to design and construct the Center, including Rife & Wood Architects, Martin Brothers Construction, DP Design, Star City Masonry, Dan Chitwood Design, Lloyd Concrete Services and Seven Oaks Landscapes, Hardscapes.

The Boxley, Block, Brick & Hardscape Center's interior features architectural masonry products, including colored, ground, polished and glazed concrete masonry units. The sales counter is constructed of Trendstone® concrete masonry terminating at a column wrapped in an Astraglaze® masonry column wrap. There are more than 100 brick sample boards across the walls. There also is a brick wall showcasing brick shapes, patterns and accent pieces. Glass block, shower and window kits also are featured. A Project Center complete with a database of installed Boxley products give customers a real perspective on what a final look will be. Customers can view pictures of brick, pavers, concrete block, veneer stone installed on jobs on a 42" flat screen.

Opening this fall, the Outdoor Living Idea Center is designed to meet the growing customer demand for residential outdoor living spaces. The 4,000 square-foot Outdoor Living Idea Center sparks the imagination with ideas on how to extend the indoors outside. Special features include an outdoor kitchen area, pergola, fireplace and a variety of segmental and stone walls, concrete and brick pavers, flagstone and stepping stones including granite cobblestones.

Boxley has consolidated its operations from its Shenandoah Avenue location in the new Center. The new Center features a separate contractor entrance for dedicated and efficient service and an upgraded Tool Center. All delivery truck traffic enters from a separate gate away from the customer showroom and load out area.

Boxley, Block, Brick & Hardscape Center is managed by Brian Corell, who has managed the Shenandoah Avenue location since 2006. The Center has eight employees, including five masonry and hardscaping sales consultants to assist customers in selecting the best products for their projects.

The Center will be open Monday through Friday, 7:00 a.m. until 5:00 p.m. The phone number is 540-342-3411.

About Boxley

Since 1892, Boxley has supplied quality construction materials to communities in central and western Virginia and West Virginia. Boxley quarries rock used to produce aggregate, block, and concrete. Boxley products are essential in the construction of homes, schools, hospitals, buildings, and landscaping as well as the maintenance and construction of roads and bridges. Boxley actively supports the communities it serves through programs such as Boxley Explore the Earth for school children, Boxley Community Giving and its extensive Natural Resource Management and Protection programs.
