

Manufactured Soil

Boxley has consistent, readily available inert fill that promotes drainage, spreads easily and accepts end user soil amendment for all applications. Manufactured soil is also environmentally safe for plants and wildlife and great for the following applications:

- **Finish grading**, commercial and residential
- **Back fill**, for retaining wall, construction and utility
- **Landscaping and bedding medium**
- **Borrow material**

Manufactured soil is available at four Boxley quarries with the following textures, structures and chemistry:

- **Sandy loam**
slightly acidic with PH <6.5 - Fieldale Quarry
- **Sandy loam**
texture with PH <7.0 - Mt. Athos Quarry
- **Sandy clay loam**
texture with PH >7.5+ - Lawyers Road Quarry
- **Crushed shale**
slightly alkaline with PH <7.5, less than 2% organic with a minus one inch texture - Beckley Quarry
